Climate Emergency

Our theme this year is the climate emergency. We will be looking at how asset management can meet the challenges of climate change, and how it develops organisational resilience to the impacts of climate change.

About the IAM

The Institute of Asset Management is the international professional body for asset management professionals. We develop knowledge and best practice, and generate awareness of the benefits of the asset management discipline for individuals, organisations and wider society. We are a not-for-profit organisation with a global network of individuals in over 65 countries and 51 business sectors.

What is asset management?

Asset management is the coordinated activity of an organisation to realise value from assets; where assets are classed as an item, thing or entity that has potential or actual value to an organization.

Asset management is relevant to all types of organisation – and there is growing evidence from around the world that effective asset management can improve an organisation's reputation and its ability to: operate safely; meet regulatory and statutory obligations; evaluate future business strategies; and reduce the cost of managing assets over their lifecycle.

“ At the IAM we are developing our approach to climate change and the climate emergency. Clearly, we need to collectively address the drivers of climate change, especially greenhouse gas emissions. We also need to address how we adapt and achieve resilience to those changes, and we recognize the need to do this in the context of sustainable development as described by the United Nations. What we value in society is key, and as values around the world change, asset management is adapting to reflect and embrace these values.

URSULA BRYAN
*President
Institute of Asset
Management*

DIVERSITY IN DECISION MAKING IN CLIMATE CHANGE

Derrick Dunkley

*Data Lifecycle and Asset Manager
National Grid*

Fellow of the Institute of Asset Management (IAM), a Registered Asset Management Professional and Fellow of the Royal Society of Arts. Derrick has more than twenty years working in engineering utilities in the United Kingdom, more than 10 years' senior leadership experience with asset management, and holds a Masters degree in Business. He is the National Grid Patron IAM representative and Chair of the Global Inclusion Committee at the Institute of Asset Management.

INTRODUCTION TO ASSET MANAGEMENT

Really get to grips with a quick crash course in asset management – learn some of the language and terminology, understand the drivers and standards and consolidate your understanding of what good asset management is all about.

Jennifer DeVries

*Principal Asset
Management Consultant
PA Consulting*

Jennifer works across numerous sectors including energy, utilities and defence. She is an active member of IAM NxtGen and regularly delivers introduction to asset management workshops and presentations.

NET ZERO INFRASTRUCTURE INDUSTRY COALITION - WHAT'S IT ALL ABOUT?

The Coalition's report *Is Our Carbon Wallet Empty?* considers our understanding of embodied carbon across all infrastructure sectors and why it is critically important that we improve our grasp of this. In this panel event we discuss the findings, the challenges and the recommendations from the report and hear the perspectives of our individual Coalition members on what needs to be done and what 'good' looks like for the infrastructure industry.

REDUCING THE ENVIRONMENTAL IMPACT OF CONSTRUCTION

This session has three broad themes. Firstly, understanding the interplay between weather and infrastructure and how we adapt to future climates. Secondly, considering Carbon Cost Management and its importance in designing infrastructure assets. Finally, highlighting the importance of taking a holistic view of assets in line with net zero aspirations.

Dr David Jackson

*Senior Carbon Consultant
Sweco*

David had a background in weather forecasting, before studying carbon management strategies and the challenges of implementing them in infrastructure. He now works as Senior Carbon Consultant for Sweco.

More Day 1 speakers...

Colin Elkins

*As Global Vice
President of
Manufacturing*

Industries at IFS, Colin plays an instrumental role in decision making, working with food & beverage, chemicals, life sciences, mills and metals industries. He is a chartered engineer with previous senior engineering and consultancy experience.

Richard Park

*Richard focuses on the
challenge of coastal
adaptation for Flood*

Risk Management and leads on the National Habitat Creation Programme for Natural Resources Wales. He is a former Associate Lecturer at the Open University, trained marine biologist and coastal scientist.

In the next programme release, we'll unveil more about the amazing presentations held by industry experts. See page 9 for a sneak peek...

FROM POLIICY TO PRACTICE: BUILDING RESILIENCE IN CANADA'S COMMUNITIES

Carole Saab

CEO
Federation of Canadian Municipalities

Carole is a tireless champion for cities and communities, driving an ambitious vision for local government leadership in building a more sustainable, prosperous and inclusive Canada. She is consistently voted as one of the Top 100 Lobbyists in Canada, and is a 2020 recipient of "Canada's Top 40 Under 40", and the "Women of Influence in Local Government Award" from Municipal World. An accomplished strategist with a decade of experience, she has been a driving force behind securing investment and progress for society.

WHERE AND HOW DOES AM THINKING ADDRESS THE CLIMATE EMERGENCY?

These sessions will take a journey around each element of the asset management landscape and discuss the part it plays in addressing the climate emergency. Two parallel workshops: one aimed at introductory level, and one aimed at mature asset management.

John Woodhouse

CEO
TWPL

John led the development of BSI PAS 55 and is on the ISO 55000 committee. He runs international training and consultancy firm TWPL, and has authored 4 books on asset management. He was a founding member of the IAM.

IAM'S CLIMATE EMERGENCY PROGRAMME: ROUNDTABLE

An introduction to the IAM Climate Emergency Programme, to share the aims and objectives of the group and develop the programme of projects and initiatives needed to address the climate emergency.

**Sally Sudworth,
Ashley Barratt**

*Co-Chairs, Climate
Emergency Group*

Sally is a chartered engineer and chartered environmentalist working at Mott MacDonald as global head of sustainability and climate change.

Ashley Barratt of Jacobs spends his professional life building teams, transforming organisations and championing people and technology centered solutions.

STAINLESS STEELS; THE RESILIENT GREEN SOLUTION FOR PROTECTING OUR PEOPLE

The session will look at how stainless steels have been successfully employed to provide long-lasting, maintenance-free solutions for protecting people and land against extreme weather events along coastlines.

Tim Collins

*Secretary-General
ISSF*

Tim joined the World Stainless Association in 2019, after over 30 years working for Finnish and British stainless steel organisations. He has studied metallurgy and has been fascinated by industrial uses of stainless steel from a young age.

More Day 2 speakers...

Kathryn Kimball

Kathryn is BMT's Business Development Manager for Resilience in UK and Europe. This includes Climate Risk and Resilience, Energy Resilience (including Renewables) and Green Shipping/ Resilience of Ports.

Greg Fisk

Greg is BMT's Global Campaign Lead for Climate Risk and Resilience. He has over 25 years of experience in natural hazard and climate change planning and adaptation studies across both public and private sector organisations.

In the next programme release, we'll unveil more about the amazing presentations held by industry experts. See page 9 for a sneak peek...

ASSESSING INFRASTRUCTURE SUSTAINABILITY

Prof. Andreas Georgoulas

*Director of Sustainability and Risk
Environmental Financial Consulting Group*

Learn about the rating systems being used in the USA to assess the sustainability of major infrastructure, driving benchmarking practices and business change across sectors. Published author and former Harvard professor, Andreas also brings over 20 years of advisory experience to the conference. With a track record of assessing infrastructure assets worth over \$16 billion for sustainability/ESG, this session is a chance to learn from one of the most prominent sustainability voices in the field.

NATURAL CAPITAL & SIX CAPITALS CONSIDERATIONS INTO AM STRATEGY

Asset management is embracing the extension of ESG responsibilities and making decisions based on six capitals – understand what they are and how they're now being used to influence asset management decisions.

Rhys Davis
Atkins
John Green
Anglian Water

John has over 15 years experience in various asset management roles and led Anglian Water to ISO55001 certification. He's an experienced conference speaker and IAM volunteer.

Rhys is a recognised asset management thought leader and Chair of the ISO/TC251 committee. He is currently Global Consulting Leader for asset management at Atkins.

CLIMATE EMERGENCY RESPONSE STRATEGIES IN THE EAST AFRICAN REGION

The East African Region has taken initiative to combat the Climate Change Emergency, however, more can be done especially in regards to Asset Management practices in the region. This session will focus on reviewing the commitment in the region to respond to the Climate Change Emergency.

Ssanyu Kaganzi
*CEO
Asset Business Solutions*

As CEO of Asset Business Solutions, Ssanyu leads a team of professionals in delivering performance and unleashing potential to enhance organizational stability. She is a qualified Electrical Engineer, and is passionate about optimum utilisation of assets.

More Day 3 speakers...

Kate Levick

Kate Levick leads E3G's activities on Sustainable Finance, working with a wide range of public and private finance sector stakeholders to support ambitions finance and climate policy outcomes.

Dan Gill

At EY, Dan helps the utilities industry identify, shape and deliver the transformations they need to remain safe, competitive, efficient and relevant. He helps them deal with changes that regulatory scrutiny, increased customer expectation and advancements in technology bring.

Paul Casto

Paul is an Asset Performance Management Industry Principal at

GE Digital and is a leading practitioner in Asset Performance Management (APM), reliability, and maintenance improvement methodologies. He is also the current chair for the Society of Maintenance and Reliability Professionals (SMRP).

In the next programme release, we'll unveil more about the amazing presentations held by industry experts. See page 9 for a sneak peek...

Sponsors and Exhibitors

IFS develops and delivers enterprise software for companies around the world who manufacture and distribute goods, build and maintain assets, and manage service-focused operations. The industry expertise of our people and of our growing ecosystem, together with a commitment to deliver value at every single step, has made IFS a recognized leader and the most recommended supplier in our sector. Our team of 4,000 employees every day live our values of agility, trustworthiness and collaboration in how we support our 10,000+ customers.

More session details announced 26 April...

We will continue to release information on the thought-provoking and informative sessions on the agenda in the coming months. In our next release we'll announce more of the presentations from leading organisations and experts. Here's a sneak peak at some of the session titles:

- Net Zero Alone is Not Enough to Adapt and Thrive
- Climate Change and Sea Level Rise: Challenges and opportunities for delivering sustainable flood risk management in Wales
- Coalitions for Climate Resilient Investment
- How Do I Manage my Assets to be Climate Resilient?
- Planet Earth: Our Most Important Asset
- Introduction to the Fly Zero R&D Programme
- The Impact of Maintenance and Reliability on Environmental Sustainability
- See more items on the [draft agenda](#) (subject to change)...
