<p>One The organisation context and stakeholder subjects. These should be subjects that set the boundary conditions that inform the approach to AM within an organisation.</p>	<p>Two The subjects relating to the AM planning and approach taken by the organisation .</p>	<p>Three The people related subjects. Including AM leadership, resourcing and competence that inform the culture of an organisation. Resource planning should also be included here.</p>	<p>Four The information related subjects applicable to AM. Including the way information is managed as an asset and the importance to AM decision making.</p>	<p>Five The subjects relating to Life cycle delivery of AM. Should not duplicate or contradict the Maintenance Framework.</p>	<p>Six The subjects relating to Governance and the management of AM within an organisation. Including the AM system approach taken by the organisation.</p>	<p>Seven The subjects relating to how value is created through doing AM and the actual value created. Subjects related to measuring outcomes not just performance of assets.</p>
<p>Context and stakeholders</p>	<p>AM Planning</p>	<p>Leadership and people</p>	<p>Information</p>	<p>Delivery</p>	<p>Governance</p>	<p>Value realization</p>
