Join us over 2 days in Birmingham (23-24th November) for this year's IAM UK Chapter Conference.

Our theme this year is 'What Does Climate Emergency mean for Asset Management?'

Climate change is here and the rate of change means that it is rightly being called a climate Emergency. But what does climate emergency mean for asset management?

How do we adapt our assets to reduce their environmental impacts whilst increasing their resilience? We have large asset portfolio's, so where do we start? How do we plan for likely future scenarios and build the business case for investment?

The IAM UK Chapter Conference will explore these topics and bring together many of the leading minds in this space.

Learn from our speakers and network with peers to understand what this means for you and your organization.
